nguyencongmanh.vercel.app

CORE STACK

■ React · Next.js · React Native
■ TypeScript · JavaScript
■ Tailwind · Framer Motion
■ Node.js · GraphQL · REST
■ AWS (Amplify, Lambda, DynamoDB, S3, SQS, Cognito, AppSync)
■ Solidity · Hardhat · Ethers.js
■ PostgreSQL · MongoDB · Elastic
■ Git · CI/CD · App Store / Play

HIGHLIGHTS

- › 10 live apps on the App Store
- › ~200K monthly users (WhaleStats)
- › Shipped across VN · MY · US

EDUCATION

FPT University

BS, Software Engineering

2011 — 2015

Frontend engineer who ships the whole product

Frontend-focused full-stack developer with a decade of shipping production software across Vietnam, Malaysia and the US. I lead the frontend end-to-end across React, Next.js and React Native, and step into the backend — Node.js, GraphQL, AWS and Solidity — whenever a product needs it. 10 apps live on the App Store; co-built a platform that scaled to ~200K monthly users. I take a design and turn it into a fast, pixel-accurate interface, then carry it through to release.

EXPERIENCE

Product Studio — with Nam Nguyen

2015 — Present

Frontend-Focused Full-Stack Developer · Remote · Da Nang

- › Engineering partner on a serial product team where Nam leads product and I lead the frontend — building and shipping mobile apps, web platforms and web3 products from zero to launch.
- › Owned the client side across React, Next.js and React Native: turned designs into fast, pixel-accurate, animated interfaces and ran the full iOS/Android release pipeline.
- › Stepped into the backend when needed — Node.js, GraphQL, AWS Lambda/DynamoDB/S3 — and integrated Solidity smart contracts for the web3 products.
- › Co-built WhaleStats (crypto whale analytics), scaling it to ~200K monthly users.
- › Joined Cardpool (US gift-card exchange) remotely with the team in 2019–20: maintained and extended a large multi-service system in Angular, Ruby, Node.js and AWS microservices, with code review and Agile delivery.

Finexus Software

2016 — 2018

Software Engineer · Kuala Lumpur, Malaysia

- › Built banking products integrating with data-processor services and digital wallets for secure, efficient transactions.
- › Worked directly with bank customers on feature and correction requests; mentored juniors and interns on the system.

FPT Software

2015 — 2016

Software Engineer · Da Nang, VN · onsite Japan

- › Spent ~4 months onsite in Japan supporting the client team directly.
- › Built features with Spring MVC and a Java Swing front-end; managed the project's Oracle database.

Selected work

Live demos, screenshots and full case studies at nguyencongmanh.vercel.app

WEB PLATFORMS (LIVE)

Moreso — web3 luxury fashion IP Frontend lead. Turned the founders' and artists' designs into shipped features; built the smart-contract integration and the viral 'reveal' feature that drove its biggest marketing moment.

moreso.io

OpenCTO — crypto-powered ads on X Built the frontend — campaign flows, wallet connection and the marketing site — for the first crypto-powered advertising platform on X (Twitter).

opentcto.vercel.app

AgentCTO — community AI agent launchpad Built the interactive launchpad frontend and on-chain integration: daily AI brainstorm, community vote & crowdfund, fair token launch and airdrops.

agentcto.vercel.app

GroupPump — coordinated launch campaigns Built the campaign-management frontend for exploring, creating and running community token-launch campaigns.

MOBILE — APP STORE (10 LIVE)

VocabTunes — AI vocab as a TikTok-style swipe feed, scored with music — top-200 downloads of the day. [App Store](#) ■

King English Kids Anime — AI anime videos & voiced flashcards for kids — top-15 downloads of the day. [App Store](#) ■

WenLambo AI — Snap a memecoin chart, get an AI Buy / Sell / Hold call with the reasoning. [App Store](#) ■

New Scan QR Code — Instant full-screen QR scanner plus a custom generator — ad-free. [App Store](#) ■

Buzzed — A do-or-drink party card game with themed deck packs and custom rules. [App Store](#) ■

YIKES! — Modern truth-or-dare that reads each card out loud. [App Store](#) ■

Rouly — Party roulette — spin the wheel, it picks who's next. [App Store](#) ■

Most Likely To — Listen & vote — the app reads each question aloud and runs the countdown. [App Store](#) ■

Never Ever — Never-have-I-ever, fully automated and hands-free. [App Store](#) ■

Dilemma — Would-you-rather as a faster party game with a player wheel. [App Store](#) ■

EARLIER PRODUCTS

WhaleStats Crypto whale-wallet analytics — co-built to ~200K monthly users; once a top-10 crypto voice on Twitter.

KoalaChat Location-based chat that turns cafes, bars and campuses into rooms. React Native + AWS AppSync.

Oqeo Women-only ride-hailing (driver and rider both women). React Native + Apollo GraphQL + MongoDB.

BaeCafe · ChainAlerts · KryptKitties NFT collections and an NFT floor-price alert platform (Email/Telegram/Slack/Line). React + Solidity + Node.js.
